## EXPERIENCE

### LUXOFT (2021 - TO DATE)

#### Senior Software Engineer

##### Front-End React Native Developer

Refine, Plan, and complete user stories using the Scrum methodology to implement new features and attend to support reported bugs by priority in a sprint-based time frame. Worked in an eight devs team with PO, Scrum Master, and a UX team.

*React Native, React, Jira, Slack, Github, CircleCI, SonarCloud, Postman, Unit Testing, Jest, Husky*

##### Client-Facing and Team Leading

Daily and fluent communication with the client to establish, polish, and define the requirements for new features and support bugs handling as well as having to bring down that information to the development team and lead the processes and best practices to accomplish the commitments

### GYO SOLUTIONS (2014 -2021)

#### Full Stack Developer- View - Server - DB

##### Mobile Apps (30+): Hybrid mobile Apps published

Using different frameworks, I have developed more than 30 commercial apps, both Business and Public oriented.

##### Driver App for a transportation company:

From scratch, an app that allows drivers to report the status of their assigned trips, take an attendance list and show their estimated time of arrival.

*TypeScript, Angular 7, Firebase, Ionic, Cordova, MYSQL, PHP, Maps JSAPI, Android, OneSignal, Bootstrap, JSON, SaaS*

##### Social endorsement and reporting system:

From scratch, an app that lets users co-evaluate the performance in group activities endorsing and recognizing good performance and reporting bad behavior in the process.

*TypeScript, React Native, Firebase, Android, iOS, OneSignal, Bootstrap, JSON, SaaS, QR Codes.*

##### Web (40+): CMS Dashboards Public sites

Most of the mobile apps I have created consume the information from a CMS and show and report usage or statistics in admin dashboards with Graphs, PDF and Excel reports, and Web and Mobile Push Notifications.

*AngularJS, Angular 7, TypeScript, Firebase, Cordova, MYSQL, PHP, Maps JSAPI, OneSignal, Graph API, JSON, SaaS, GraphJS.*
